

Bangladesh (Compared with other countries in WHO South-east Asia Region)

Indicator:

Healthy life expectancy at age 60 (years), 2001

Definition: Healthy life expectancy (HALE) is based on life expectancy (LEX), but includes an adjustment for time spent in poor health. This indicator measures the equivalent number of years in full health that a person at age 60 years can expect to live based on the current mortality rates and prevalence distribution of health states in the population.

Legend:

- Healthy life expectancy at age 60 (years), males, 2001
- Healthy life expectancy at age 60 (years), females, 2001

Country	Ordered by Healthy life expectancy at age 60 (years), males, 2001
