

Bangladesh (Compared with other countries in WHO South-east Asia Region)

Indicator:

Per capita government expenditure on health at average exchange rate (US\$), 2000

Definition: Public Health Expenditure (PHE) per capita is the per capita amount of the sum of outlays on health paid for by taxes, social security contributions and external resources (without double-counting the government transfers to social security and extra-budgetary funds).

Country	Ordered by Per capita government expenditure on health at average exchange rate (US\$), 2000
Maldives	84
Thailand	41
Myanmar	26
